To Whom It May Concern:

RE: Testimonial Letter for Ng Zhili

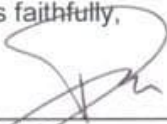

Zhili was employed as an Assistant Engineer at Kruger Engineering for 3 months (12 weeks) from **11 February to 10 May 2019**. He kick-started his internship journey learning Fan Laws which were fundamental, and at the same time, critical to his field of work. Zhili assisted in the selection of mechanical and jet fans based on the needs and specifications as requested by clients and ensured that the fans quoted could meet the budget requirements of every project. In addition, he effectively utilised his knowledge gained from his seniors as well as the company's technical bulletins, to facilitate in the acoustic analysis of mechanical ventilation fans for projects where he calculated the acceptable sound tolerance levels in order to designate suitable sound attenuators for fans in distinct ducting systems. Zhili also displayed proficiency in using his knowledge of fluid dynamics, CAD software, blueprint and isometric drawings to perform static pressure calculations in mechanical ventilation, fan coil units and air handling units systems especially for the North London Collegiate School (NLCS) Project. Zhili was also involved in many other noteworthy projects such as Ang Mo Kio JTC Space, JTC Punggol Digital District, JTC CleanTech Park, Gali Batu Bus Depot, Woodlands North Coast Condominium and LTA Marina Bus Terminal.

Zhili is a bright and charismatic individual and it was demonstrated through his excellent rapport with our staff in his department. He is an excellent team player as he follows instructions well with little supervision and takes the initiative to contribute to the projects to the best of his abilities. Zhili is highly self-motivated and independent as he fully utilises any spare time to refresh his concepts on fan engineering. He is also adaptable to the ad-hoc tasks assigned to him and is able to remain clear-headed and objective in completing his work. Zhili takes pride in representing Kruger and it is shown by his positive work ethics on a daily basis. Coupled with a never-say-die attitude, Zhili has innovated new methods using Microsoft Excel, which improved the overall efficiency and productivity of his department.

Zhili was a great addition to Kruger Engineering. His willingness to learn and eagerness to excel makes him a remarkable asset to any company or team. He did an outstanding job and we greatly appreciate his service during his internship. He has the qualities and skillsets of a professional leader and we are confident that he will continue to exhibit extraordinary performance in his future workplace.

We wish him all the best in his future endeavours.

Yours faithfully,

David Lau
General Manager
